Landing + copy — Delivery pack

E-commerce Store — E-commerce

Prepared for: Client
Deliverable: Landing + copy
Date: 06/10/2026

What shipped

landing page for E-commerce Store (E-commerce).

Live URL (path): /sites/e-commerce-store-dbd89c7bd6e6-muwhk3xi

Open in browser: <https://omnigrouptech.com/sites/e-commerce-store-dbd89c7bd6e6-muwhk3xi>

Pages generated: 1

How to share with clients

Send <https://omnigrouptech.com/sites/e-commerce-store-dbd89c7bd6e6-muwhk3xi> as your hosted presence under omnigrouptech.com. Custom domain DNS is not included — keep the URL or add a redirect at your registrar.

SEO & social basics

Title/meta and Open Graph tags are set on the published page. Favicon is served from the site shell. Verify with a link preview tool after you share the URL.

Analytics snippet guide (you add the ID)

Plausible: add `<script defer data-domain="YOUR_DOMAIN" src="https://plausible.io/js/script.js"></script>` via a future content refresh, or track outbound clicks to this URL in your existing analytics.

GA4: create a property, copy Measurement ID (G-XXXX), and paste into your marketing stack; this package prepares the placement guide, not a live GA property.

Retargeting pixel placement guide

Meta/Google remarketing pixels require your ad account ID. Place the pixel on the live page only after ads credentials are live — do not invent pixel IDs. Until then, use the contact CTA as the conversion event.

Next upgrades

Vertical focus: ecommerce growth; marketplace competition; conversion optimization. Upsell path: custom domain, content refresh retainer, or CRM sync when inbound is live.
