

Omni Group

Business website — Delivery pack

Legal Studio — Legal

Prepared for: Client
Deliverable: Business website
Date: 06/10/2026

What shipped

multi-page business website for Legal Studio (Legal).

Live URL (path): /sites/legal-studio-808b610cbdf0-muwmv8xg

Open in browser: <https://omnigrouptech.com/sites/legal-studio-808b610cbdf0-muwmv8xg>

Pages generated: 10

How to share with clients

Send <https://omnigrouptech.com/sites/legal-studio-808b610cbdf0-muwmv8xg> as your hosted presence under omnigrouptech.com. Custom domain DNS is not included — keep the URL or add a redirect at your registrar.

SEO & social basics

Title/meta and Open Graph tags are set on the published page. Favicon is served from the site shell. Verify with a link preview tool after you share the URL.

Analytics snippet guide (you add the ID)

Plausible: add `<script defer data-domain="YOUR_DOMAIN" src="https://plausible.io/js/script.js"></script>` via a future content refresh, or track outbound clicks to this URL in your existing analytics.

GA4: create a property, copy Measurement ID (G-XXXX), and paste into your marketing stack; this package prepares the placement guide, not a live GA property.

Retargeting pixel placement guide

Meta/Google remarketing pixels require your ad account ID. Place the pixel on the live page only after ads credentials are live — do not invent pixel IDs. Until then, use the contact CTA as the conversion event.

Google Business Profile checklist

1) Claim GBP for the business name. 2) Match NAP to the contact page. 3) Add services/pricing categories from the live site. 4) Link the live URL in GBP website field. 5) Upload 3+ real photos (client-owned).

Next upgrades

Vertical focus: matter intake cycle time; conflict check automation; retainer collection friction. Upsell path: custom domain, content refresh retainer, or CRM sync when inbound is live.
