E-commerce storefront — Delivery pack

Fitness Studio — Fitness

Prepared for: Client
Deliverable: E-commerce storefront
Date: 06/10/2026

What shipped

ecommerce storefront (complete) for Fitness Studio (Fitness).
Live URL (path): /sites/fitness-studio-5d3ebb045395-muwpg1uq
Open in browser: <https://omnigrouptech.com/sites/fitness-studio-5d3ebb045395-muwpg1uq>
Pages generated: 7
Catalog products: 8

How to share with clients

Send <https://omnigrouptech.com/sites/fitness-studio-5d3ebb045395-muwpg1uq> as your hosted presence under omnigrouptech.com. Custom domain DNS is not included — keep the URL or add a redirect at your registrar.

SEO & social basics

Title/meta and Open Graph tags are set on the published page. Favicon is served from the site shell. Verify with a link preview tool after you share the URL.

Analytics snippet guide (you add the ID)

Plausible: add `<script defer data-domain="YOUR_DOMAIN" src="https://plausible.io/js/script.js"></script>` via a future content refresh, or track outbound clicks to this URL in your existing analytics.

GA4: create a property, copy Measurement ID (G-XXXX), and paste into your marketing stack; this package prepares the placement guide, not a live GA property.

Retargeting pixel placement guide

Meta/Google remarketing pixels require your ad account ID. Place the pixel on the live page only after ads credentials are live — do not invent pixel IDs. Until then, use the contact CTA as the conversion event.

Checkout & shop operations

Buyers get a live shop page, industry catalog with per-SKU stock, cart, configurable tax/shipping, and a working order path.

Bank transfer always works (payment reference on each order). Card checkout uses Stripe TEST when platform keys are configured.

Orders create a CRM contact and an in-app notification for the site owner; stock decrements on each successful order.

EXTERNAL CONFIGURATION REQUIRED: Stripe LIVE keys and client Stripe Connect / own merchant account are not wired by this package.

Next upgrades

Vertical focus: Fitness SMB market; local lead generation; digital adoption pain points. Upsell path: custom domain, content refresh retainer, or CRM sync when inbound is live.
