Technical & Digital Readiness Audit

Client — Agriculture

Prepared for: Client
Deliverable: Technical audit
Date: 07/10/2026

Executive summary

Client operates in Agriculture (agriculture). This audit evaluates stack readiness, security posture, conversion funnel integrity, and operational automation maturity against Agriculture peer benchmarks.

Agriculture-specific audit lenses:

- Traceability
- Harvest timing
- Input control

Headline findings (deterministic baseline — refine with live discovery notes):

- Primary value thesis: End-to-end delivery for Agriculture: CRM, automations, lead gen, and AI support — no platform resale, only finished output.
- Recommended core modules: crm, client-hunter, outreach, automation, billing
- Top research lenses: Poljoprivreda SMB market; local lead generation; digital adoption pain points
- Domain tokens in scope: crop cycle, field sensor, traceability lot, harvest window
- 90-day outcome target: portal live, CRM pipeline seeded, first automation closed-loop, measurable lead response SLA

Risk posture (preliminary) for Agriculture: Medium until auth, backup, and payment-confirm paths are evidence-checked. Priority risks:

- Missed harvest windows
- Input inventory stockouts
- Traceability gaps on lots

Current state assessment

Industry focus areas for Agriculture:

- Poljoprivreda SMB market — score current maturity (1–5) and evidence location
- local lead generation — score current maturity (1–5) and evidence location
- digital adoption pain points — score current maturity (1–5) and evidence location
- compliance and onboarding — score current maturity (1–5) and evidence location

Capability scorecard (fill during kickoff):

- Identity & access (SSO/MFA, admin least-privilege)
- CRM hygiene (stages, owners, SLA clocks)
- Outbound/inbound attribution
- Billing / fulfillment handoff reliability
- Content & SEO basics for acquisition pages
- Traceability — evidence note
- Harvest timing — evidence note

Quality gates used as acceptance bar:

- Research complete (TAM + competition in research_data)
- Artifacts generated (module, landing, workflow, outreach, quality pack)

- Dynamic pricing quote valid for verticalSlug
- CRM pipeline and lead source defined
- Outreach draft reviewed before send (domain warmup)
- Smoke test / owner sign-off before client delivery

Security & compliance

Checklist for Agriculture — mark each item Pass / Fail / N/A with evidence:

1. TLS everywhere (no mixed content); HSTS where applicable
2. Secrets not in client bundles; rotation cadence documented
3. Auth: password reset, session expiry, role separation for admin vs client
4. Backup: encrypted at rest, restore drill within last 90 days
5. Audit log for payment confirm and privilege changes
6. Rate limits / abuse controls on public forms and APIs
7. Dependency and image patch policy for production hosts
8. Lot traceability for food-safety recalls
9. Agrochemical application logs retained
10. Worker safety briefings documented

Milestone: complete this checklist before any production DNS cutover (Phase 1).

Recommended stack & integrations

For Client in Agriculture, prioritize:

- Modules: crm, client-hunter, outreach, automation, billing
- Primary offers: Workflow design (€1212); Technical audit (€967); Full onboarding (€2069); Custom integration (€2436)
- Keywords / positioning: poljoprivreda, SMB, local business, automation, agriculture
- Lot ID correlates field, inputs, and shipments
- Sensor alerts create ops tasks

Integration order (avoid big-bang):

1. Portal auth + notifications
2. CRM pipeline + lead source tags
3. Payment confirm !' fulfillment webhook
4. Outreach / follow-up only after CRM stages are stable

90-day roadmap

Phase 1 — Days 1–30 (foundations)

- Kickoff + access inventory
- Portal/auth smoke tests
- Security checklist baseline (Agriculture compliance items)
- Lot ID scheme live

Phase 2 — Days 31–60 (revenue path)

- Discover local leads: discover (client-hunter)
- Score leads: score (lead-scoring)
- CRM capture: create-contact (crm)
- Outreach sequence: sequence (outreach)

Phase 3 — Days 61–90 (scale & measure)

- Follow-up: run
- Billing: invoice

- KPI review (Agriculture): Yield vs plan; Lot traceability completeness; Input waste %
- Acceptance: owner sign-off against quality gates

Milestones:

1. M1 Go-live checklist green
2. M2 First closed automation loop
3. M3 ROI dashboard reviewed with client
4. M4 Lot ID scheme live
5. M5 Input inventory baseline
6. M6 Traceability dry-run

ROI estimate & acceptance checklist

Conservative model for Agriculture assumes 15–25% operational improvement and reduced admin hours from automation within 90 days. Track weekly KPIs:

- Yield vs plan
- Lot traceability completeness
- Input waste %

Acceptance checklist (purchase justification):

- & Executive summary names client + Agriculture
- & Security checklist completed with evidence notes
- & Industry compliance items covered: crop cycle, field sensor, traceability lot
- & Stack recommendations map to activated modules
- & 90-day roadmap has dated phases + milestones
- & ROI metrics owners assigned
- & Outreach hooks validated: Turnkey delivery for Poljoprivreda — no platform resale | CRM + automations tailored to your niche

Discovery agenda & evidence requests

Kickoff discovery for Client (Agriculture) — capture answers with owner + evidence links:

1. How are fields and lots identified?
2. What sensors / logs exist today?
3. Who owns harvest scheduling?

Evidence pack to attach before Phase 2:

- Current CRM export or stage screenshot
- Auth / admin role matrix (who can confirm payments)
- Public site URL + analytics property IDs (if any)
- Domain risk notes for: Missed harvest windows; Input inventory stockouts
- Sales pains to validate: Paper field logs; Recall fear; Weather-driven chaos

Milestone: discovery notes filed in kickoff ticket within 5 business days.

Competitive & positioning notes

Agriculture positioning for Client against peer SMB benchmarks:

- Value thesis: End-to-end delivery for Agriculture: CRM, automations, lead gen, and AI support — no platform resale, only finished output.
- Keywords to own: poljoprivreda, SMB, local business, automation, agriculture
- Outreach hooks: Turnkey delivery for Poljoprivreda — no platform resale; CRM + automations tailored to your niche; Lead gen and follow-up in one package
- Distinctive tokens to keep in client copy: crop cycle, field sensor, traceability lot, harvest window, input inventory

Competitive checklist:

- & List 3 local/regional peers and their primary CTA
- & Note pricing transparency (menu / package / quote-only)
- & Capture review volume + response SLA on Google/Facebook if present
- & Map peer gaps to Agriculture lenses: Traceability; Harvest timing; Input control

Acceptance: positioning one-pager reviewed with owner before paid ads or outbound.
