Technical & Digital Readiness Audit

Client — Admin Support

Prepared for: Client
Deliverable: Technical audit
Date: 06/10/2026

Executive summary

Client operates in Admin Support (admin_support). This audit evaluates stack readiness, security posture, conversion funnel integrity, and operational automation maturity against Admin Support peer benchmarks.

Admin Support-specific audit lenses:

- Inbox hygiene
- Calendar reliability
- SOP coverage

Headline findings (deterministic baseline — refine with live discovery notes):

- Primary value thesis: End-to-end delivery for Admin Support: CRM, automations, lead gen, and AI support — no platform resale, only finished output.
- Recommended core modules: automation, crm, tasks, notifications, client-hunter
- Top research lenses: virtual assistant market; SMB admin outsourcing; workflow automation
- Domain tokens in scope: virtual assistant, inbox triage, calendar management, SOP checklist
- 90-day outcome target: portal live, CRM pipeline seeded, first automation closed-loop, measurable lead response SLA

Risk posture (preliminary) for Admin Support: Medium until auth, backup, and payment-confirm paths are evidence-checked. Priority risks:

- Inbox backlog without triage SLA
- Calendar double-books across timezones
- SOPs drift when VA turnover happens

Current state assessment

Industry focus areas for Admin Support:

- virtual assistant market — score current maturity (1–5) and evidence location
- SMB admin outsourcing — score current maturity (1–5) and evidence location
- workflow automation — score current maturity (1–5) and evidence location

Capability scorecard (fill during kickoff):

- Identity & access (SSO/MFA, admin least-privilege)
- CRM hygiene (stages, owners, SLA clocks)
- Outbound/inbound attribution
- Billing / fulfillment handoff reliability
- Content & SEO basics for acquisition pages
- Inbox hygiene — evidence note
- Calendar reliability — evidence note

Quality gates used as acceptance bar:

- Research complete (TAM + competition in research_data)
- Artifacts generated (module, landing, workflow, outreach, quality pack)
- Dynamic pricing quote valid for verticalSlug

- CRM pipeline and lead source defined
- Outreach draft reviewed before send (domain warmup)
- Smoke test / owner sign-off before client delivery

Security & compliance

Checklist for Admin Support — mark each item Pass / Fail / N/A with evidence:

1. TLS everywhere (no mixed content); HSTS where applicable
2. Secrets not in client bundles; rotation cadence documented
3. Auth: password reset, session expiry, role separation for admin vs client
4. Backup: encrypted at rest, restore drill within last 90 days
5. Audit log for payment confirm and privilege changes
6. Rate limits / abuse controls on public forms and APIs
7. Dependency and image patch policy for production hosts
8. PII access limited to assigned VA roles
9. Client credential vault policy (no shared passwords in chat)
10. Outbound email send-as authorization documented

Milestone: complete this checklist before any production DNS cutover (Phase 1).

Recommended stack & integrations

For Client in Admin Support, prioritize:

- Modules: automation, crm, tasks, notifications, client-hunter
- Primary offers: Quick setup (€504); Vertical solution (€725); Priority support (€366); Workflow design (€908)
- Keywords / positioning: virtual assistant, admin support, data entry, executive assistant
- Tag tasks with client + source channel
- Calendar webhooks for conflict detection

Integration order (avoid big-bang):

1. Portal auth + notifications
2. CRM pipeline + lead source tags
3. Payment confirm !' fulfillment webhook
4. Outreach / follow-up only after CRM stages are stable

90-day roadmap

Phase 1 — Days 1–30 (foundations)

- Kickoff + access inventory
- Portal/auth smoke tests
- Security checklist baseline (Admin Support compliance items)
- Inbox triage live

Phase 2 — Days 31–60 (revenue path)

- Discover: discover (client-hunter)
- Automation: run (automation)
- Tasks: create (tasks)
- CRM: create-contact (crm)

Phase 3 — Days 61–90 (scale & measure)

- Notify: send
- KPI review (Admin Support): Inbox first-response time; Task completion SLA %; Calendar conflict rate
- Acceptance: owner sign-off against quality gates

Milestones:

1. M1 Go-live checklist green
2. M2 First closed automation loop
3. M3 ROI dashboard reviewed with client
4. M4 Inbox triage live
5. M5 Calendar ownership mapped
6. M6 SOP pack signed

ROI estimate & acceptance checklist

Conservative model for Admin Support assumes 15–25% operational improvement and reduced admin hours from automation within 90 days. Track weekly KPIs:

- Inbox first-response time
- Task completion SLA %
- Calendar conflict rate

Acceptance checklist (purchase justification):

- & Executive summary names client + Admin Support
- & Security checklist completed with evidence notes
- & Industry compliance items covered: virtual assistant, inbox triage, calendar management
- & Stack recommendations map to activated modules
- & 90-day roadmap has dated phases + milestones
- & ROI metrics owners assigned
- & Outreach hooks validated: Automate repetitive VA tasks | CRM + task queue for your team

Discovery agenda & evidence requests

Kickoff discovery for Client (Admin Support) — capture answers with owner + evidence links:

1. Which inboxes and tools must the VA own day-one?
2. What is the escalation path for VIP clients?
3. Where do SOPs live today?

Evidence pack to attach before Phase 2:

- Current CRM export or stage screenshot
- Auth / admin role matrix (who can confirm payments)
- Public site URL + analytics property IDs (if any)
- Domain risk notes for: Inbox backlog without triage SLA; Calendar double-books across timezones
- Sales pains to validate: Founder stuck in inbox; Missed follow-ups; No documented handoff for assistants

Milestone: discovery notes filed in kickoff ticket within 5 business days.

Competitive & positioning notes

Admin Support positioning for Client against peer SMB benchmarks:

- Value thesis: End-to-end delivery for Admin Support: CRM, automations, lead gen, and AI support — no platform resale, only finished output.
- Keywords to own: virtual assistant, admin support, data entry, executive assistant
- Outreach hooks: Automate repetitive VA tasks; CRM + task queue for your team; Fewer data entry errors
- Distinctive tokens to keep in client copy: virtual assistant, inbox triage, calendar management, SOP checklist, task SLA

Competitive checklist:

- & List 3 local/regional peers and their primary CTA
- & Note pricing transparency (menu / package / quote-only)

- & Capture review volume + response SLA on Google/Facebook if present
- & Map peer gaps to Admin Support lenses: Inbox hygiene; Calendar reliability; SOP coverage

Acceptance: positioning one-pager reviewed with owner before paid ads or outbound.
