

Omni Group

Workflow Design & SOP Pack

Client — Admin Support

Prepared for: Client
Deliverable: Workflow design
Date: 06/10/2026

Process map overview

Client (Admin Support) end-to-end flow:

1. Discover !' discover
2. Automation !' run
3. Tasks !' create
4. CRM !' create-contact
5. Notify !' send

Value proposition this workflow protects: End-to-end delivery for Admin Support: CRM, automations, lead gen, and AI support — no platform resale, only finished output.

Admin Support workflow nuances:

- Triage !' assign !' execute !' confirm !' log
- VIP escalate within SLA

RACI (default): Responsible = module operator; Accountable = client admin; Consulted = Omni fulfillment; Informed = finance on paid events.

Process step 1: Discover

Action: discover

Primary module: client-hunter

Owner role: Growth / ops lead

SLA: respond or advance stage within 4 business hours

Admin Support nuance:

- Triage !' assign !' execute !' confirm !' log
- VIP escalate within SLA

SOP snippet:

1. Trigger condition documented in CRM or automation rule
2. Required inputs validated (contact, source, consent)
3. Execute discover via client-hunter
4. Log outcome + next stage; escalate exceptions to human queue

Tools available in this vertical: automation, crm, tasks, notifications, client-hunter

Domain tokens: virtual assistant, inbox triage, calendar management

Process step 2: Automation

Action: run

Primary module: automation

Owner role: Specialist + reviewer

SLA: respond or advance stage within 1 business day

Admin Support nuance:

- Triage !' assign !' execute !' confirm !' log
- VIP escalate within SLA

SOP snippet:

1. Trigger condition documented in CRM or automation rule
2. Required inputs validated (contact, source, consent)
3. Execute run via automation
4. Log outcome + next stage; escalate exceptions to human queue

Tools available in this vertical: automation, crm, tasks, notifications, client-hunter

Domain tokens: virtual assistant, inbox triage, calendar management

Process step 3: Tasks

Action: create

Primary module: tasks

Owner role: Specialist + reviewer

SLA: respond or advance stage within 1 business day

Admin Support nuance:

- Triage !' assign !' execute !' confirm !' log
- VIP escalate within SLA

SOP snippet:

1. Trigger condition documented in CRM or automation rule
2. Required inputs validated (contact, source, consent)
3. Execute create via tasks
4. Log outcome + next stage; escalate exceptions to human queue

Tools available in this vertical: automation, crm, tasks, notifications, client-hunter

Domain tokens: virtual assistant, inbox triage, calendar management

Process step 4: CRM

Action: create-contact

Primary module: crm

Owner role: Specialist + reviewer

SLA: respond or advance stage within 1 business day

Admin Support nuance:

- Triage !' assign !' execute !' confirm !' log
- VIP escalate within SLA

SOP snippet:

1. Trigger condition documented in CRM or automation rule
2. Required inputs validated (contact, source, consent)
3. Execute create-contact via crm
4. Log outcome + next stage; escalate exceptions to human queue

Tools available in this vertical: automation, crm, tasks, notifications, client-hunter

Domain tokens: virtual assistant, inbox triage, calendar management

Automations, KPIs & rollout checklist

Automations to enable after manual dry-run:

- Discover: auto-discover with human override
- Automation: auto-run with human override
- Tasks: auto-create with human override
- CRM: auto-create-contact with human override
- Notify: auto-send with human override

Admin Support KPI set:

- Inbox first-response time
- Task completion SLA %
- Calendar conflict rate

Operational risks to watch:

- Inbox backlog without triage SLA
- Calendar double-books across timezones
- SOPs drift when VA turnover happens

Rollout checklist:

- & Day 1: map stages in CRM
- & Day 3: dry-run with sample lead
- & Week 2: enable first automation
- & Week 4: KPI review + SOP sign-off
- & Milestone: Inbox triage live
- & Milestone: Calendar ownership mapped
- & Milestone: SOP pack signed
- & Gate: Research complete (TAM + competition in research_data)
- & Gate: Artifacts generated (module, landing, workflow, outreach, quality pack)
- & Gate: Dynamic pricing quote valid for verticalSlug
- & Gate: CRM pipeline and lead source defined
- & Gate: Outreach draft reviewed before send (domain warmup)
- & Gate: Smoke test / owner sign-off before client delivery
