

Omni Group

Workflow Design & SOP Pack

Client — AI & Data

Prepared for: Client
Deliverable: Workflow design
Date: 06/10/2026

Process map overview

Client (AI & Data) end-to-end flow:

1. Market discover !' discover
2. AI memory seed !' remember
3. Lead score !' score
4. CRM !' create-contact
5. Outreach !' sequence
6. Analytics !' track

Value proposition this workflow protects: End-to-end delivery for AI & Data: CRM, automations, lead gen, and AI support — no platform resale, only finished output.

AI & Data workflow nuances:

- Ingest !' embed !' retrieve !' generate !' review !' ship

RACI (default): Responsible = module operator; Accountable = client admin; Consulted = Omni fulfillment; Informed = finance on paid events.

Process step 1: Market discover

Action: discover

Primary module: client-hunter

Owner role: Growth / ops lead

SLA: respond or advance stage within 4 business hours

AI & Data nuance:

- Ingest !' embed !' retrieve !' generate !' review !' ship

SOP snippet:

1. Trigger condition documented in CRM or automation rule
2. Required inputs validated (contact, source, consent)
3. Execute discover via client-hunter
4. Log outcome + next stage; escalate exceptions to human queue

Tools available in this vertical: ai-rag, craftor, client-hunter, crm, analytics

Domain tokens: model evaluation, RAG pipeline, data lineage

Process step 2: AI memory seed

Action: remember

Primary module: ai-memory

Owner role: Specialist + reviewer

SLA: respond or advance stage within 1 business day

AI & Data nuance:

- Ingest !' embed !' retrieve !' generate !' review !' ship

SOP snippet:

1. Trigger condition documented in CRM or automation rule
2. Required inputs validated (contact, source, consent)
3. Execute remember via ai-memory
4. Log outcome + next stage; escalate exceptions to human queue

Tools available in this vertical: ai-rag, craftor, client-hunter, crm, analytics

Domain tokens: model evaluation, RAG pipeline, data lineage

Process step 3: Lead score

Action: score

Primary module: lead-scoring

Owner role: Specialist + reviewer

SLA: respond or advance stage within 1 business day

AI & Data nuance:

- Ingest !' embed !' retrieve !' generate !' review !' ship

SOP snippet:

1. Trigger condition documented in CRM or automation rule
2. Required inputs validated (contact, source, consent)
3. Execute score via lead-scoring
4. Log outcome + next stage; escalate exceptions to human queue

Tools available in this vertical: ai-rag, craftor, client-hunter, crm, analytics

Domain tokens: model evaluation, RAG pipeline, data lineage

Process step 4: CRM

Action: create-contact

Primary module: crm

Owner role: Specialist + reviewer

SLA: respond or advance stage within 1 business day

AI & Data nuance:

- Ingest !' embed !' retrieve !' generate !' review !' ship

SOP snippet:

1. Trigger condition documented in CRM or automation rule
2. Required inputs validated (contact, source, consent)
3. Execute create-contact via crm
4. Log outcome + next stage; escalate exceptions to human queue

Tools available in this vertical: ai-rag, craftor, client-hunter, crm, analytics

Domain tokens: model evaluation, RAG pipeline, data lineage

Automations, KPIs & rollout checklist

Automations to enable after manual dry-run:

- Market discover: auto-discover with human override
- AI memory seed: auto-remember with human override

- Lead score: auto-score with human override
- CRM: auto-create-contact with human override
- Outreach: auto-sequence with human override
- Analytics: auto-track with human override

AI & Data KPI set:

- Eval pass rate
- Hallucination / escalation rate
- RAG retrieval precision@k

Operational risks to watch:

- Hallucinations shipped without human review
- Stale embeddings after source updates
- Unclear ownership of model quality gates

Rollout checklist:

- & Day 1: map stages in CRM
- & Day 3: dry-run with sample lead
- & Week 2: enable first automation
- & Week 4: KPI review + SOP sign-off
- & Milestone: Eval suite baseline
- & Milestone: RAG corpus indexed
- & Milestone: Human review queue live
- & Gate: Research complete (TAM + competition in research_data)
- & Gate: Artifacts generated (module, landing, workflow, outreach, quality pack)
- & Gate: Dynamic pricing quote valid for verticalSlug
- & Gate: CRM pipeline and lead source defined
- & Gate: Outreach draft reviewed before send (domain warmup)
- & Gate: Smoke test / owner sign-off before client delivery
