Quick Setup — Go-Live Checklist

Client — Admin Support

Prepared for: Client
Deliverable: Quick setup
Date: 06/10/2026

Kickoff scope & owners

Client — Admin Support (admin_support) — quick setup tier.

- Value thesis: End-to-end delivery for Admin Support: CRM, automations, lead gen, and AI support — no platform resale, only finished output.
- Modules to activate: automation, crm, tasks, notifications, client-hunter
- Domain focus: virtual assistant, inbox triage, calendar management, SOP checklist
- Owners: client admin (access), Omni fulfillment (config), finance (payment confirm)

Day 1 checklist:

- & Access list collected
- & Brand/legal name confirmed
- & Industry category locked (admin_support) for vertical pack
- & Success metric agreed (e.g. first paid delivery < 7 days)
- & Inbox triage live
- & Calendar ownership mapped

Portal & auth

1. Create client portal user; verify login + password reset email
2. Confirm admin vs client role separation
3. Smoke-test session expiry and logout
4. Bookmark dashboard URL for handoff
5. Document recovery contacts if MFA/email delivery fails

Acceptance: client can log in without Omni assistance (Milestone M1).

KPI (Admin Support): Inbox first-response time

Payments & notifications

- Manual bank-transfer reference flow tested end-to-end
- Admin confirm '!' fulfillment notification observed
- Invoice / receipt email path verified
- Contact form delivers to support inbox
- Failed-notify path surfaces in admin ops inbox

Day 2 checklist: & payment notify & invoice & contact form & failure alert & client download path

CRM seed & industry templates

Quick setup seeds labeled DEMO / industry-template CRM rows for Admin Support so the team can practice stages without inventing live leads.

- Domain focus: virtual assistant, inbox triage, calendar management, SOP checklist, task SLA
- DEMO_SAMPLE tags must remain visible until replaced with a real export
- Primary account row kept for the buying contact

- Workflow nuances: Triage !' assign !' execute !' confirm !' log; VIP escalate within SLA

Checklist: & open CRM & identify DEMO rows & advance one sample lead & decide import vs stay-on-samples
Milestone: first Admin Support stage practice complete before Day 5 hypercare ends.

Launch & SLA

1. DNS/HTTPS smoke (or hosted path) green
2. Record go-live timestamp
3. Share dashboard + this checklist PDF
4. Agree 5-business-day hypercare window
5. Schedule Day 5 check-in for open issues

Admin Support compliance reminders:

- PII access limited to assigned VA roles
- Client credential vault policy (no shared passwords in chat)
- Outbound email send-as authorization documented

Industry hooks to mention on handoff: Automate repetitive VA tasks; CRM + task queue for your team; Fewer data entry errors

Go-live acceptance: & smoke green & client login & payment path & hypercare calendar invite

Day-5 hypercare & acceptance

Hypercare window for Client (Admin Support) — close these items before marking setup done:

1. Owner can download this PDF from Deliveries without Omni help
2. Billing invoice / payment history visible to entitled users
3. Notifications bell shows the welcome / fulfillment notice
4. KPI snapshot started: Inbox first-response time; Task completion SLA %; Calendar conflict rate
5. Risk watchlist logged: Inbox backlog without triage SLA; Calendar double-books across timezones

Day-5 checklist:

- & Open issues listed with owners
- & DEMO CRM cleanup decision recorded
- & Setup milestones: Inbox triage live; Calendar ownership mapped; SOP pack signed
- & Upsell path noted (full onboarding / audit) only if requested

Acceptance: hypercare calendar invite sent; no invented live metrics.

Owner runbook & escalation

Day-to-day runbook for Client operators in Admin Support:

1. Login !' Notifications !' Billing !' Deliveries (download this PDF + markdown pack)
2. Confirm any bank-transfer payment from Admin only when reference matches
3. Open a support ticket with payment/order ID if fulfillment artifacts are missing
4. Escalate Admin Support compliance questions using: PII access limited to assigned VA roles; Client credential vault policy (no shared passwords in chat)
5. Revisit discovery prompts when scope changes: Which inboxes and tools must the VA own day-one?; What is the escalation path for VIP clients?

Honesty boundaries (do not oversell):

- Portal entitlements + setup PDF are COMPLETE for this package
- External ads / Apollo / LinkedIn APIs remain NOT CONNECTED unless separately wired

- Custom domain DNS stays with the client registrar
- Integration notes for later packages: Tag tasks with client + source channel; Calendar webhooks for conflict detection

Modules referenced: automation, crm, tasks, notifications, client-hunter

Keywords / positioning: virtual assistant, admin support, data entry, executive assistant

Checklist: & operators named & escalation email known & Deliveries download verified & no invented lead counts
