Quick Setup — Go-Live Checklist

Client — Audio & Music

Prepared for: Client
Deliverable: Quick setup
Date: 06/10/2026

Kickoff scope & owners

Client — Audio & Music (audio_music) — quick setup tier.

- Value thesis: End-to-end delivery for Audio & Music: CRM, automations, lead gen, and AI support — no platform resale, only finished output.
- Modules to activate: crafter, crm, deal-offer, template-engine, client-hunter
- Domain focus: session stems, loudness LUFS, rights clearance, podcast episode
- Owners: client admin (access), Omni fulfillment (config), finance (payment confirm)

Day 1 checklist:

- & Access list collected
- & Brand/legal name confirmed
- & Industry category locked (audio_music) for vertical pack
- & Success metric agreed (e.g. first paid delivery < 7 days)
- & Spec sheet agreed
- & Stem vault ready

Portal & auth

1. Create client portal user; verify login + password reset email
2. Confirm admin vs client role separation
3. Smoke-test session expiry and logout
4. Bookmark dashboard URL for handoff
5. Document recovery contacts if MFA/email delivery fails

Acceptance: client can log in without Omni assistance (Milestone M1).

KPI (Audio & Music): Revision cycles per episode

Payments & notifications

- Manual bank-transfer reference flow tested end-to-end
- Admin confirm '!' fulfillment notification observed
- Invoice / receipt email path verified
- Contact form delivers to support inbox
- Failed-notify path surfaces in admin ops inbox

Day 2 checklist: & payment notify & invoice & contact form & failure alert & client download path

CRM seed & industry templates

Quick setup seeds labeled DEMO / industry-template CRM rows for Audio & Music so the team can practice stages without inventing live leads.

- Domain focus: session stems, loudness LUFS, rights clearance, podcast episode, mix revision
- DEMO_SAMPLE tags must remain visible until replaced with a real export
- Primary account row kept for the buying contact

- Workflow nuances: Brief !' record !' edit !' mix !' approve !' deliver

Checklist: & open CRM & identify DEMO rows & advance one sample lead & decide import vs stay-on-samples
Milestone: first Audio & Music stage practice complete before Day 5 hypercare ends.

Launch & SLA

1. DNS/HTTPS smoke (or hosted path) green
2. Record go-live timestamp
3. Share dashboard + this checklist PDF
4. Agree 5-business-day hypercare window
5. Schedule Day 5 check-in for open issues

Audio & Music compliance reminders:

- Music rights / licensing attested per deliverable
- Talent release forms stored with project ID
- Loudness targets documented (e.g. podcast LUFS)

Industry hooks to mention on handoff: CRM for audio studios; Proposal templates by project; Follow-up on pending mixes

Go-live acceptance: & smoke green & client login & payment path & hypercare calendar invite

Day-5 hypercare & acceptance

Hypercare window for Client (Audio & Music) — close these items before marking setup done:

1. Owner can download this PDF from Deliveries without Omni help
2. Billing invoice / payment history visible to entitled users
3. Notifications bell shows the welcome / fulfillment notice
4. KPI snapshot started: Revision cycles per episode; On-time delivery %; Rights clearance lead time
5. Risk watchlist logged: Revision loops without scope gates; Rights clearance missing before publish

Day-5 checklist:

- & Open issues listed with owners
- & DEMO CRM cleanup decision recorded
- & Setup milestones: Spec sheet agreed; Stem vault ready; First approved episode delivered
- & Upsell path noted (full onboarding / audit) only if requested

Acceptance: hypercare calendar invite sent; no invented live metrics.

Owner runbook & escalation

Day-to-day runbook for Client operators in Audio & Music:

1. Login !' Notifications !' Billing !' Deliveries (download this PDF + markdown pack)
2. Confirm any bank-transfer payment from Admin only when reference matches
3. Open a support ticket with payment/order ID if fulfillment artifacts are missing
4. Escalate Audio & Music compliance questions using: Music rights / licensing attested per deliverable; Talent release forms stored with project ID
5. Revisit discovery prompts when scope changes: What loudness / format specs are required?; Who owns final approval?

Honesty boundaries (do not oversell):

- Portal entitlements + setup PDF are COMPLETE for this package
- External ads / Apollo / LinkedIn APIs remain NOT CONNECTED unless separately wired

- Custom domain DNS stays with the client registrar
- Integration notes for later packages: Project ID correlates stems, contracts, and invoices; Approval webhook unlocks delivery folder

Modules referenced: craftor, crm, deal-offer, template-engine, client-hunter

Keywords / positioning: voice over, podcast, music production, audio editing, audio & music, audio music

Checklist: & operators named & escalation email known & Deliveries download verified & no invented lead counts
