Quick Setup — Go-Live Checklist

Client — Development & IT

Prepared for: Client
Deliverable: Quick setup
Date: 06/10/2026

Kickoff scope & owners

Client — Development & IT (development_it) — quick setup tier.

- Value thesis: End-to-end delivery for Development & IT: CRM, automations, lead gen, and AI support — no platform resale, only finished output.
- Modules to activate: crafter, validator, crm, automation, client-hunter
- Domain focus: CI/CD pipeline, incident runbook, SLA uptime, code review gate
- Owners: client admin (access), Omni fulfillment (config), finance (payment confirm)

Day 1 checklist:

- & Access list collected
- & Brand/legal name confirmed
- & Industry category locked (development_it) for vertical pack
- & Success metric agreed (e.g. first paid delivery < 7 days)
- & CI green path
- & Staging parity check

Portal & auth

1. Create client portal user; verify login + password reset email
2. Confirm admin vs client role separation
3. Smoke-test session expiry and logout
4. Bookmark dashboard URL for handoff
5. Document recovery contacts if MFA/email delivery fails

Acceptance: client can log in without Omni assistance (Milestone M1).

KPI (Development & IT): Deploy success rate

Payments & notifications

- Manual bank-transfer reference flow tested end-to-end
- Admin confirm '!' fulfillment notification observed
- Invoice / receipt email path verified
- Contact form delivers to support inbox
- Failed-notify path surfaces in admin ops inbox

Day 2 checklist: & payment notify & invoice & contact form & failure alert & client download path

CRM seed & industry templates

Quick setup seeds labeled DEMO / industry-template CRM rows for Development & IT so the team can practice stages without inventing live leads.

- Domain focus: CI/CD pipeline, incident runbook, SLA uptime, code review gate, environment parity
- DEMO_SAMPLE tags must remain visible until replaced with a real export
- Primary account row kept for the buying contact

- Workflow nuances: Plan !' build !' review !' deploy !' observe !' improve

Checklist: & open CRM & identify DEMO rows & advance one sample lead & decide import vs stay-on-samples
Milestone: first Development & IT stage practice complete before Day 5 hypercare ends.

Launch & SLA

1. DNS/HTTPS smoke (or hosted path) green
2. Record go-live timestamp
3. Share dashboard + this checklist PDF
4. Agree 5-business-day hypercare window
5. Schedule Day 5 check-in for open issues

Development & IT compliance reminders:

- Secret scanning on CI required
- Access least-privilege for prod environments
- Change / incident runbooks versioned

Industry hooks to mention on handoff: Automate client onboarding and quoting; CRM + pipeline for dev projects; Less admin, more billable hours

Go-live acceptance: & smoke green & client login & payment path & hypercare calendar invite

Day-5 hypercare & acceptance

Hypercare window for Client (Development & IT) — close these items before marking setup done:

1. Owner can download this PDF from Deliveries without Omni help
2. Billing invoice / payment history visible to entitled users
3. Notifications bell shows the welcome / fulfillment notice
4. KPI snapshot started: Deploy success rate; MTTR; Change failure rate
5. Risk watchlist logged: Prod changes without rollback plan; Environment drift breaks releases

Day-5 checklist:

- & Open issues listed with owners
- & DEMO CRM cleanup decision recorded
- & Setup milestones: CI green path; Staging parity check; Incident runbook drill
- & Upsell path noted (full onboarding / audit) only if requested

Acceptance: hypercare calendar invite sent; no invented live metrics.

Owner runbook & escalation

Day-to-day runbook for Client operators in Development & IT:

1. Login !' Notifications !' Billing !' Deliveries (download this PDF + markdown pack)
2. Confirm any bank-transfer payment from Admin only when reference matches
3. Open a support ticket with payment/order ID if fulfillment artifacts are missing
4. Escalate Development & IT compliance questions using: Secret scanning on CI required; Access least-privilege for prod environments
5. Revisit discovery prompts when scope changes: What is the current CI/CD path to prod?; Who owns incident response?

Honesty boundaries (do not oversell):

- Portal entitlements + setup PDF are COMPLETE for this package
- External ads / Apollo / LinkedIn APIs remain NOT CONNECTED unless separately wired

- Custom domain DNS stays with the client registrar
- Integration notes for later packages: Deploy tags correlate commits + tickets + incidents; Alert webhooks create incident tickets automatically

Modules referenced: crafter, validator, crm, automation, client-hunter

Keywords / positioning: software development, web development, dev agency, freelance developer, development & it, development it

Checklist: & operators named & escalation email known & Deliveries download verified & no invented lead counts
