Business website — Delivery pack

Beauty Studio — Beauty

Prepared for: Client
Deliverable: Business website
Date: 07/10/2026

What shipped

multi-page business website for Beauty Studio in Beauty (beauty).

Live URL (path): /sites/beauty-studio-41ddde9afba2-muxi6zbq

Open in browser: <https://omnigrouptech.com/sites/beauty-studio-41ddde9afba2-muxi6zbq>

Pages generated: 10

Value thesis: End-to-end delivery for Beauty: CRM, automations, lead gen, and AI support — no platform resale, only finished output.

Domain tokens in copy scope: appointment book, treatment consent, product retail attach, no-show fee, stylist utilization

Research lenses: Lepota i wellness SMB market; local lead generation; digital adoption pain points; compliance and onboarding

Brand & messaging checklist

Confirm the live page reads as Beauty Studio — not a platform placeholder.

- & Brand/title shows Beauty Studio
- & Primary offer language fits Beauty
- & CTA matches sales path (contact / book / buy)
- & Industry phrases present: appointment book, treatment consent, product retail attach, no-show fee
- & Pain points reflected: Empty chairs; Paper consents; Weak rebooking

Milestone M1: owner screenshots the hero + CTA for kickoff ticket evidence.

How to share with clients

Send <https://omnigrouptech.com/sites/beauty-studio-41ddde9afba2-muxi6zbq> as your hosted presence under omnigrouptech.com.

Custom domain DNS is not included — keep this URL or add a redirect / CNAME at your registrar when ready.

Share checklist:

1. Paste the absolute URL into email signature and social bios
2. Add to proposals as “live preview” before custom domain
3. Share with sales so demos use the same CTA as the site
4. Mention Beauty positioning: Turnkey delivery for Lepota i wellness — no platform resale | CRM + automations tailored to your niche

Acceptance: one outbound message with the live URL sent by the client team.

SEO & social basics

Title/meta and Open Graph tags are set on the published page. Favicon is served from the site shell.

- Primary keywords to monitor: lepota i wellness, SMB, local business, automation, beauty
- Verify link previews (Slack/WhatsApp/LinkedIn) after first share

- Keep NAP consistent if you also claim Google Business Profile
- Avoid inventing review counts or Beauty certifications not yet earned

Day-7 checklist: & preview card OK & title unique & no Omni chrome in visible copy

Analytics snippet guide (you add the ID)

This package prepares placement guidance — it does not create a live analytics property for you.

Plausible:

Add `<script defer data-domain="YOUR_DOMAIN" src="https://plausible.io/js/script.js"></script>` via a future content refresh, or track outbound clicks to this URL in your existing analytics.

GA4:

Create a property, copy Measurement ID (G-XXXX), and paste into your marketing stack when ready. Until then, treat contact CTA clicks as the conversion event.

Beauty KPIs to wire once analytics is live:

- Booking fill rate
- No-show %
- Stylist utilization
- Retail attach rate

Checklist: & property created & ID stored in password manager & goal/event named for primary CTA

Retargeting pixel placement guide

Meta/Google remarketing pixels require your ad account ID. Do not invent pixel IDs.

1. Create the pixel / tag in your ads account
2. Place it on the live page only after credentials are live
3. Map the primary CTA as the conversion event
4. Align creative with Beauty pains: Empty chairs; Paper consents

Honesty rule: ads channels remain NOT CONNECTED until you wire keys — the site CTA still works without pixels.

Milestone: pixel plan documented even if install is deferred.

Launch QA & acceptance

QA gate for Beauty Studio (Beauty) before paid traffic:

- & Mobile viewport: hero + CTA readable without horizontal scroll
- & Contact / checkout path returns success feedback
- & No System Admin / Omni Group chrome in visible title or body
- & Research complete (TAM + competition in research_data)
- & Artifacts generated (module, landing, workflow, outreach, quality pack)
- & Dynamic pricing quote valid for verticalSlug
- & CRM pipeline and lead source defined
- & Treatment consent forms retained
- & Allergen / patch-test notes where required

Acceptance: owner signs kickoff ticket that the live URL is shareable.

Google Business Profile checklist

Align GBP with the Beauty multi-page site for Beauty Studio:

1. Claim GBP for the exact business name
2. Match NAP to the contact page
3. Add services/pricing categories from the live site
4. Link the live URL in the GBP website field
5. Upload 3+ real photos (client-owned — not stock placeholders)
6. Reflect differentiators: appointment book, treatment consent, product retail attach

Milestone: GBP website field points at the hosted URL before local ads.

30-day content & CRM follow-through

After launch, keep Beauty momentum without inventing metrics:

- & Online book live
- & Consent forms digital
- & Reminder path tested
- & Review KPIs weekly: Booking fill rate; No-show %; Stylist utilization
- & Watch risks: No-shows destroy utilization; Consent missing for new treatments
- & Log inbound leads in CRM with source = site CTA

Discovery prompts for the first optimization call:

1. What booking tool is used?
2. How are consents captured?
3. What retail attach goals exist?

Vertical focus: Lepota i wellness SMB market; local lead generation; digital adoption pain points.

Upsell path (only if requested): custom domain, content refresh retainer, audit, or CRM sync when inbound is live.

Next upgrades

- Custom domain DNS (client-owned registrar)
- Content refresh retainer for seasonal offers
- Deeper Beauty audit if stack/security questions remain
- Integration package when third-party APIs must be wired
